

Adding pictures to your TWT Community web page

Go to www.Picasa.Google.com and sign up for a free account by clicking the "Picasa Web Albums" link. Then upload your pictures.

On your uploaded picture, right click and select "Properties". On the properties dialog, the URL of the picture will be listed. It will look something like:

["http://lh4.ggpht.com/_XFI0KgY0p7U/S0FgyPjuiHI/AAAAAAAAAQw/iaDt0-Tklbc/Logo.png"](http://lh4.ggpht.com/_XFI0KgY0p7U/S0FgyPjuiHI/AAAAAAAAAQw/iaDt0-Tklbc/Logo.png)

Select and Copy the URL.

Open your TWT Community web page in edit mode, then click on the page where you want the picture to appear. Click the "Insert Image" button. On the dialog box that appears, paste the URL in the "Picture Source" field, then "OK". The picture will show up on your page, you can now resize the image if you like.
