

Dear Wrestling friend,

I want to save you time and effort.

I wanted to let you know about a couple of time saving products that we are offering to our customers.

First, all AutoBracket customers are entitled to a free club web page. This free web page is fully customizable by you and includes a Front Page, a web calendar, and an events page. Please check out a couple of these free club web pages at:

[www.truewindtech.com/clubs](http://www.truewindtech.com/clubs).

Second, I wanted to let you know that we offer an on line registration system that is designed to work seamlessly with AutoBracket. This system will make your life as a tournament director much easier. Think about it, you can put the responsibility of the data entry on the parents of the wrestlers instead of you!! This also means that the accuracy of the data is now the responsibility of someone else (the parents or coaches). You, as the tournament director, can review the entries on line at any time. You can customize the registration pages as you please. When registration closes, you simply download the entries and import them into AutoBracket. Hours of hard, tedious data entry are eliminated, all for just 50 cents per entrant!!

Please let me know if you are interested in receiving more information about either of these products.
